ISO 9001:2026 Quality Management System Internal Auditor

Course Content

The syllabus focuses on:

Day 1

- Understanding the revised structure and terminology
- Climate change considerations within the organization's context
- Leadership responsibility, quality culture and ethical behaviour
- Risks and opportunities in quality management
- Organizational changes and maintaining QMS results
- Quality objectives, process performance, customer requirements and continual improvement

Day 2

- Understanding auditor responsibilities and expectations under ISO 19011
- Audit criteria, audit planning, sampling and objective evidence
- Initiating and preparing an internal audit
- Conducting process-based and risk-based audits
- Interviewing, observation and evidence evaluation
- Analysis and classification of audit findings
- Audit reporting, corrective action and follow-up

Who Should Attend

- Management Representatives
- ISO Management System Steering Committee
- Internal Auditors
- Personnel responsible for supplier/client audit on IMS
- Personnel responsible for ISO conformance and management system implementation

Method of Study

Our participants benefit from a learner-centered approach based on active learning and problem-centric principles.

This is conducted through active participation methods such as role-playing, group discussion, quiz, and feedback. Problem-based learning enables participants to find solutions to issues through case studies, classroom discussion, and sample templates.

Course Outcome

- Preparing, conducting and follow-up on ISO 9001 audit activities
- Identifying and applying the benefits and requirements of an ISO 9001 audit
- Gaining skills to assess an organization's capability to manage its management systems
- Writing factual audit reports and suggesting corrective actions

Assessment & Certification

Participants will receive a certificate of completion upon successfully meeting the grading for the final assessments.
