

Risk Consultancy Services

by ISRC (MOM Approved Risks Consultant)

Implementing an effective **Workplace Safety and Health Risk Management (RM)** is critical in order for organizations to achieve a safe and healthy workplace. A critical part of RM is the Risk Assessments, which is an excellent platform in hazard identification, risk evaluation and risk control.

Stakeholders are increasingly under pressure to fulfill their obligations under the Workplace Safety and Health Act and the Workplace Safety and Health (Risk Assessment) Regulations which came into operation on 1st September 2006. The Regulations require all workplaces to conduct a comprehensive Risk Assessment (RA) on work process and implement the necessary control measures to eliminate or reduce safety and health risks posed to any person.

ISRC will train your staff on risk assessment and guide them through the risk assessment process and the implementation of risk control measures. We will assist you in setting up a risk management system and heighten your risk assessment capability

HOW CAN WE SUPPORT YOU

Step 1

APPLY FOR RISK MANAGEMENT ASSISTANCE FUND (RMAF)

Small Medium Enterprise (SMEs)* can tap onto the RMAF to defray the cost of engaging ISRC in building their in-house Risk Management capabilities. The fund is able to support up to 90% of the training and consultancy fees, subject to a cap of \$6000 and claim up to \$400 to offset the administrative fees of engaging a RMAF Agent.

Step 2

STAFF DEVELOPMENT

It is important that your staff and management gained an insight on the Risk Management System and understand the importance of early risk identification and controls. ISRC will be able to conduct a training led consultancy for your organization.

Learning Outcomes:

- Understand WSH Risk Management System and Methodology
- Be able to conduct Risk Assessments
- Be able to implement control measures based on the Hierarchy of Control
- Be able to establish an appropriate safe work procedures

Step 3

DEVELOPING & IMPLEMENTATION OF RISK MANAGEMENT SYSTEM

ISRC consultants will work together with your key personnel to understand the organization work process and gather relevant information. We provide the expert knowledge to advise, review and improve the system and ensure that the Regulatory and Organization deliverables are achieved.

Key deliverables for Risk Management System:

1. An effective WSH Risk Management System & Methodology
2. Defined key accountability and responsibilities of designated persons
3. Establishing an effective Risk Assessment Team
4. Develop the risk register and list of work activities/processes
5. Risk assessments are completed and controls prioritized by risk level with implementation schedule and residue risk levels
6. Risk assessments linked to appropriate safe work procedures

Step 4

COMMUNICATION & CERTIFICATION

Upon successful completion of the organization risk management system and risk assessments, the next important step is to ensure that the stakeholders know the risks they face and the appropriate control measures to be implemented to reduce the risk. This form of communication will engage employees, contractors and even visitors in the risk management process and provides clarity on the risks, processes, control measures, perceptions, etc.

In event that the organization wishes to be certified in bizSAFE Level 3, ISRC will assist you in engaging and approved auditor and through the certification process.
