

# ISO 14001 – SUSTAINABLE DEVELOPMENT

## Environmental Management System ISO 14001 – Road Map to Certification

Environmental impact is increasing becoming important and recognized internationally. Companies are expected to meet the requirements from authorities, regulators, trade associations, consumers, interested parties, non-government organizations (NGOs) and stakeholders. ISO 14001 is an internationally accepted standard that sets out how you can go about putting in place an effective Environmental Management System (EMS). The standard is designed to address the delicate balance between maintaining profitability and reducing environmental impact.

ISRC prepares your organization for staff development, environment management system set up & implementation and arrange you for certification by accredited auditing firm.

### What's in ISO 14001?

## HOW CAN WE SUPPORT YOU .....

### Step 1 : Staff Development

Designated personnel (such as Environmental Managers, Quality Managers, HR Managers, HSE Managers, etc) who have been assigned to implement the Environmental Management System (EMS) for the organization needs to understand the system's requirements and methodology. ISRC provides the relevant depth and breadth of training required for client's staff who will be involved in the EMS. Training is individually tailored to ensure relevant knowledge and skills transfer enabling a successful roll out the program.

#### ISO 14001 Environmental Management System Training ( 1 day)

Learning outcome:

- Gain the practical skills and knowledge required to begin implementing an EMS
- Understand and able to use the EMS results achieving tools
- Understand how to overcome some of the difficulties in getting an EMS to work
- Understand the benefits of an environmental management system to the business

Contact [training@isrc.com.sg](mailto:training@isrc.com.sg) for the next available course date or check out [www.isrc.com.sg](http://www.isrc.com.sg)

### Step 2 : Developing & Implementation of Environmental Management System (EMS)

ISRC consultants will work together with your key personnel to identify critical environmental performance outcomes. We are able to provide the expert technical know-how on the systems, carry out reviews and offer opportunities to improve the EMS which should be integrated into the organizations existing process and procedures. The EMS, together with the other systems should be cohesive and operate to the benefits of the organization.

#### There are 4 phases in each EMS :

Phase 1 : Gap Analysis to understand the current status

Phase 2 : Design and Development of EMS Manual & Procedures

Phase3: Implementation of EMS

Phase4: Internal Audit and Management Review

### Step 3: Preparation for Certification

Should you decide to achieve ISO 14001 certification , ISRC will be able assist you through the certification process. Our consultants will provide your organization with the necessary support and advise during the 3<sup>rd</sup> Party Certification Audit.

#### Next Step
