

OHSAS 18001 – IMPROVES HEALTH & SAFETY PERFORMANCE

Occupational Health & Safety Management OHSAS 18001 – Road Map to Certification

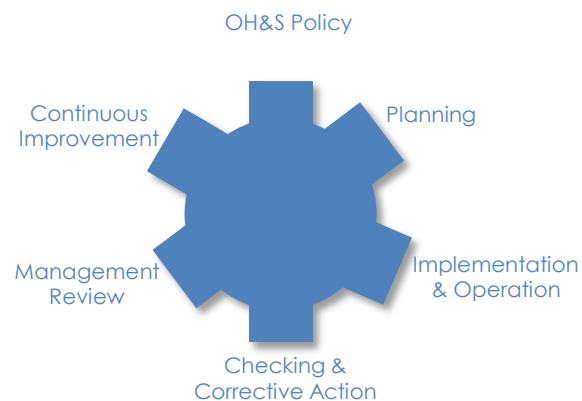

In a competitive marketplace, your customers are looking for more than just keen pricing from their suppliers. Organizations need to demonstrate that their businesses are managed efficiently and responsibly and that they can provide a reliable service without excessive downtime caused by work-related accidents.

Benefits of getting your organizations certified :

- Demonstrate your commitment to health and safety
- Demonstrate responsible risk control
- Improved organizational safety culture
- Reduced downtime and associated cost
- Reduced liability insurance cost
- Increase access to new customers and business partners

OHSAS 18001:2007 standard is compatible with ISO 9001 and ISO 14001 as well as Singapore Standards SS506

What's in ISO 18001?

HOW CAN WE SUPPORT YOU

Step 1 : Staff Development

Designated personnel (such as HSE Manages, HOD, HR Manager, etc) who have been assigned to implement an Occupational Health & Safety Management System(OHSMS) for the organization need to understand the system's requirements and methodology. ISRC provides the relevant depth and breadth of training required for client's staff who will be involved in the OHSMS. Training is individually tailored to ensure relevant knowledge and skills transfer enabling a successful roll out of the program.

OHSAS 18001 Management System Training (1 day)

Learning outcome:

- Gain the practical skills and knowledge required to begin implementing an OHSMS.
- Understand and able to use the OHSMS results achieving tools
- Understand how to overcome some of the difficulties in getting an OHSMS to work.
- Understand the benefits of an OHS management system to the business

Contact training@isrc.com.sg for the next available course date or check out www.isrc.com.sg

Step 2 : Developing & Implementation of OSH Management System

ISRC consultants will work together with your key personnel to identify critical health & safety risk and develop an effective system to manage them. We provide the expert knowledge to advise, develop, review and improve OHSMS so that the system can be integrated into your existing processes and procedures . The ultimate goal is to have a cohesive system that will operate to the benefits of your organization and meet the requirements of the OHSAS 18001:2007 standard.

There are 4 phases in each project :

Phase 1 : Gap Analysis to understand the current status

Phase 2 : Design and Development of OHSMS Manual & Procedures

Phase3: Implementation of OHSMS

Phase4: Internal Audit and Management Review

Step 3: Preparation for Certification

In event that the organization decides to achieve ISO 18001 certification , ISRC will be able to assist you through the whole certification process. Our consultants will provide your organization with the necessary support and advise during the 3rd Party Certification Audit.
