

ABOUT SS 506

The Singapore Standard (SS) on OSH Management Systems, SS 506 consists of the following parts:

- Part 1 – Requirements
- Part 2- Guidelines for the implementation of SS506: Part 1
- Part 3 – Requirements for the chemical industry

SS 506 : Part 1 is an adoption of the Occupational Health and Safety Assessment Series (OHSAS) 18001 :2007, published by the British Standard Institution.

This standard is compatible with the ISO 9001 (Quality) and ISO 14001 (Environment) such that it would facilitate the integration of quality, environmental and OSH management systems by organisations.

In Singapore, industries are subjected to legislated safety and health management system (SHMS) audit at determined interval. The SHMS audit must be conducted in accordance with the relevant WSH legislation and guidelines set out for each industry. The audit must evaluate the SHMS based on the Workplace Safety & Health Act and its subsidiary legislation, as well SS 506 : Part 1 & SS 506 : Part 3

Industries	Audited against (in addition to WSHA & its subsidiary legislations)	Audit Frequency
Construction	<ul style="list-style-type: none"> • SS506 : Part 1; and/or • CP 79 : 1999 Safety management system for construction workites; or • Construction Safety Audit Scoring System (ConSASS) 	6 mths
