

SS 506: Part 3: 2006 - Occupational Safety and Health (OSH) Management System – *Requirements for the Chemical Industry*

What's in SS 506 :Part 3 ?

SS 506 Part 3 was developed based on Singapore Standard SS 506 Part 1 – Specification for Occupational Safety & Health (OSH) Management System (A full adoption of OHSAS 18001:2007). It provides a systematic way of managing safety & health in the chemical industry by controlling the Occupational Safety and Health risks and Process Safety through goal setting, planning and measuring of Performance.

SS506 : Part 3 enable a single OSH management requirement satisfying both the OHSAS 18001 and the Code of practice as well as audit requirements for certification for the chemical industry.

Why SS506 : Part 3 ?

- **Mandatory audit** based on SS 506: Part 3 for
 - Semiconductor, Wafer Fabrication Plant
 - Oil Refinery & Petrochemical Plant
 - Chemical Manufacturing Plant
 - Pharmaceutical Plant
 - Bulk Storage Terminal
- Companies need only to undergo a single audit to meet the audit requirements of **Ministry of Manpower (MOM) and the National Environment Agency (NEA)**
(subject to the auditing service providers being approved by both agencies)
- Lead to **SS 506 Certification** or **OHSAS 18001 Certification**
- Pathway to archive **Level 5 bizSAFE STAR**

HOW CAN WE SUPPORT YOU

Step 1 : Developing & Implementation of OSH Management System

ISRC consultants will work together with your key personnel in identifying critical process operation risks and develop an effective system to manage them. We provide the expert knowledge to advise, develop, review and improve OHSMS so that the system can be integrated into your existing processes and procedures. This cohesive system will operate to the benefits of your organization and meet the requirements of the OHSMS SS 506: Part 3 standard.

There are 4 phases in each project :

Phase 1 : Gap Analysis to understand the current status

Phase 2 : Design and Development of OHSMS Manual & Procedures

Phase3: Implementation of OHSMS

Phase4: Internal Audit and Management Review

Step 2: Preparation for Mandatory Audit / Certification Audit

Our consultants will advise your organization in getting ready for mandatory/ certification audit. ISRC will be able to assist you through the complete certification process. Our consultants will provide your organization with the necessary support and advice during the 3rd Party Audits.
