Masterclass: Risk Assessment Deep Dive

Managers, engineers, executives and other professionals who will be reviewing or approving risk assessments.

This 4-hour workshop equips managers, engineers, and professionals with the skills to confidently review and approve risk assessments. Learn to identify compliance gaps, validate effective risk controls, and ensure legal standards are met—strengthening your organization's risk management and establishing you as a trusted authority in risk assessment.

Course Content

- Interpret your legal duties confidently
- Spot incomplete inventories and meet regulations
- Identify vague hazards that weaken risk management
- Find errors in severity or likelihood ratings
- Assess if controls meet the "reasonably practicable" standard
- Recognize costly knowledge gaps in risk assessments
- Ensure risk assessments meet top standards through hands-on review

Learning Outcome

- Able to comprehend legal obligations of a Employer and Principal
- Able to confidently evaluate risk assessments
- Able to spot errors and mistakes in risk assessment that may lead to legal prosecution
- Able to develop a high standard risk assessment which is compliant to legal requirements
