

WSQ ISO 14001:2015

Environmental Management System

Internal Auditor

This course delivers an in-depth and practical understanding of the ISO 14001:2015 Environmental Management System (EMS) standard, equipping participants with the technical competencies and audit methodologies required for effective internal auditing within diverse organizational contexts. The training integrates industry best practices and regulatory requirements to ensure participants can systematically assess, report, and drive continual improvement in environmental performance. Through a learner-centered, problem-based approach—incorporating real-world case studies, role-plays, and group discussions—it will develop the skills and knowledge to assess and report on the conformance and effective implementation of processes..
